SAFETY IN MOTION

Staying alive with Blank-it v5.

Blank-it v5 is the combination of intelligent software & ruggedized hardware that allows for advanced data analysis with cloud-based management.

Portal.

THE MOST NOTICEABLE CHANGE IS THE ADDITION OF A CLOUD BASED MANAGEMENT PORTAL.

Portal is your window into Blank-it management. Access software, manage user accounts, check license status, build configuration files, check vehicle usage, display analytics - all from the web based and user friendly Blank-it Portal.

- > Manage licenses
- > Check all license features
- > Manage multiple configurations

App enhancements.

BLANK-IT ENHANCED SOFTWARE FEATURES.

- > Updated licensing system which provides more feedback on when individual leases are going to expire and is more transparent if a problem is encountered (proxy settings, firewalls etc)
- > Support for GPS as a fail-safe over-ride (tamper-proof)
- > Auto scanning for GPS signals
- > Utilize serial locator API or UDP
- > Temporary over-ride - momentarily free up computer even when vehicle is in motion (Police requirement)
- > Feedback from the sensors (USB and GPS) to display signal quality
- > Service that monitors the computer and auto starts Blank-it if it stops
- > Momentary flash of the Blank-it screen over a nominated app when the keyboard is used whilst driving (if the keyboard disable function has been set)
- > Configuration contained in a single file on the computer
- > Configuration auto updates
- > Integration of GPS with USB motion sensor, combine speed & motion

Configuration.

ENHANCED ADMINISTRATION FEATURES.

- > Cloud based configuration engine
- > Set post restore behaviour to ensure required app is in focus
- > Hotkey setting for advanced Blank-it user features (standard and premium features)
- > License administration for renewals and updates
- > More control over size and position of logos and action buttons on the blank screen
- > Ability to embed custom algorithm directly into the configuration file
- > Enable Blank-it monitor to ensure Blank-it always runs
- > Ability to enable or disable GPS or USB motion sensor support in a configuration file
- > Ability to build multiple configuration files

GPS & Sensor Analytics.

CORPORATE SUBSCRIPTION FEE

- > Vehicle speed and location
- > GPS signal quality
- > Speed violation notification
- > Geofencing – assign users to a specific region
- > Catastrophic event notification
- > Inactive computer reports
- > App; start, stop, uptime

- > Driver behaviour
